

K-Love is a true blessing to me. I love listening to them, they play the best Christian music. I never have to worry about what they say on the air because I know that they will never say anything that I wouldn't want my 3 and 5 yr. old children to hear. Everyone I know listens to K-Love, we talk about the news that we hear, the songs that we like. Without K-Love I probably wouldn't listen to the radio at all, especially in the morning. I've heard the other morning shows and I don't like them, they are always talking about sex or drugs, or they are degrading someone. I'd like to keep that stuff away from my kids as long as possible. And I know that many other people in my community feel exactly the same way. K-Love is in the public interest because it is like it's motto says-positive and encouraging. If you take that away it is really going to affect thousands of people. Everyday K-Love has a positive effect on someone and helps makes lives better. There is more than enough depressing and negative influences in this world, please don't take away one of the few good things. The other stations do not have God involved at all. There's lots of negative comments towards other people and they call them jokes. Phone pranks and subjects of conversation on the other stations are always perverted or trying to make someone look stupid. Also, the music that is played has bad themes such as suicide, death, nothing matters, or about boyfriends and girlfriends having premarital sex. I just can't listen to that crap anymore, that's why my friends and I listen to K-Love. Good attitudes are just as contagious as bad attitudes. K-Love has a good attitude that people carry with them and spread to those around them. It is very important that you don't let LPFM displace K-Love's FM translator. We need K-Love and we love K-Love.
